

**Exercice 01 & Exercice 02 :** (Voir le cours)

**Exercice 03 :** (08 Points)

**Réponse :**

$$a) \quad \frac{c}{\gamma H} = \frac{1 - \cos(\beta - \bar{\phi})}{4 \sin \beta \cos \bar{\phi}}$$

$$F_s = \frac{C}{\bar{C}} = \frac{\tan \varphi}{\tan \bar{\varphi}}$$

**Par essai erreur  $F_s = 2.49$**

**b)  $H = 7.1m$**
