- URL Uniform Resource Locator.
- GPS Global Positioning System
- HTML Hypertext markup language

Question 05: read the following paragraph then try to classify each word to its category (parts of speech) (6.75 pts.)

Does Technology Actually Make Us Feel More Alone?

When I think about the question of technology and the ability it has to make us feel "alone", I think about my family, my friends and myself. As a millennial, I have grown up in such a technologically advanced world that it is becoming more and more of a second nature that children at young ages of 10 and 12 are receiving their first cellphone. While time progresses and the need for technology rises, our society as a whole is slowly starting to lose focus of the true realitcal things in life, such as self-happiness and making valuable friendships. My sole understanding of this issue comes from the overwhelming growth of technology, specifically social media.

Articles	**The(0.09)**– the– **a(0.09)**– a-a-the-a- **that**- the- **this** the-(4 arts = 0.36 pt.)
Nouns	Question **(0.09)** - technology- ability-family- friends-world- nature- children-ages-cellphone- time- need-technology-society-whole-focus- things-life-self-happiness- friendships-understanding- issue-growth- technology-media (25 nouns= 2.25 pts)
