Full name : ....

Section/ group : ..../...........

Module: English

January 2019 **First**

Semester Exam

Part one: Reading Comprehension
  A) Read the text carefully then do the activities

Dependency on Technology and Social Media With their mass spread, communicating has become easier and faster, but with no real social connection or effort with the other person. With the need of constant contact through social media and the internet or **Wi-Fi**, people continue to rely only on technology to inform them of everything they need to know.

Social Media or mainly Technology, gives us an opportunity to connect with anybody we want from anywhere we are, saving us time. According to "Daily News" 84 percent of people worldwide say they couldn't go a single day without their mobile devices or computers in their hand, That means almost everybody uses their phone in order to communicate and keep their data updated.

Technology has made the simplest of tasks even easier. To see one's grandmother who lives far away, there is no need to travel the distance to be in their company. One can run his/her computer, log in into any account of social media and web chat through it. You are lost in a foreign place, all you need is to open the **GPS**; map, and find your way easily. You have some difficulties in doing a homework; you just open the browser and search for the answer.

With all of that to say, it seems like the biggest impact that technological advances is having on social media is aiding in visualizing our social networking experience.

1- Say whether the following sentences are true or false (2 pts.)
a) Technology gives us an opportunity to connect with anybody in the world. **True (0,5 pts.)**
b) We can make a web chat through social media. **True**
